User Info

Question:

How can I set the user information (driver name) if I cannot find the User Info icon into my MyChron5 main menu?

Answer:

Starting from firmware version **01.24.44**, the User Info icon (helmet icon) has been removed from the MyChron5 main menu.

Anyway, it is possible to execute the same operation using Race Studio 3, following the steps below:

- Run Race Studio 3.
- Connect your device to the PC via Wi-Fi.
- Enter in the Device section () and click on your device name: in the right side of the window the device main menu will appear, it shows the Live Measure tab by default.

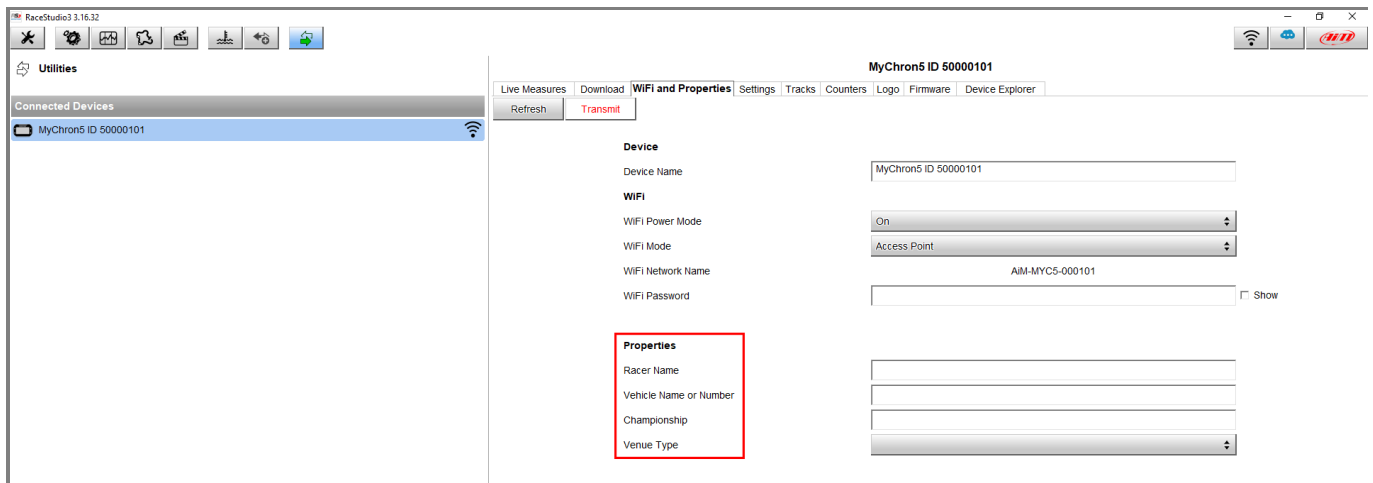

The screenshot shows the Race Studio 3 interface with the 'Live Measures' tab selected for 'MyChron5 ID 50000101'. The interface includes a 'Connected Devices' list on the left and a main data table on the right. The data table displays various performance metrics such as Lap Time, Accelerometer, Gyro, RPM, and Temperature.

MyChron5 ID 50000101					
Live Measures					
Stop Live Measures Auto Calibrate mV Values Start Recording Blink					
Lap Time	0.00.000	(0)	Logger Temperature	26.4	C
AccelerometerY	0.01	g	AccelerometerZ	-1.00	g
GyroY	1.7	deg/s	GyroZ	0.6	deg/s
RPM	0	rpm	Int Batt Voltage	4.0	V
			Calculated_Gear	#	
			iGPS (GPS Good)	0.1	km/h

N.B.: it is possible to reach the connected device main menu clicking the Configurations icon () , then on the device name in the Connected Devices list (bottom left).

Configuring

- Open the Wi-Fi and Properties tab: in the “Properties” fields it is possible to specify the driver name, the vehicle name/number, the championship name and the venue type.

Once the operation is done, click Transmit to transmit the information to the device.
